

TESAB

WS5032

HIGHLY MOBILE WHEELED STACKER

The Tesab WS5032 is a light duty mobile stockpiling conveyor that has been designed for high capacity stockpiling operations. The conveyor is perfect for both material stockpiling or material transfer between machines.

The machine's small footprint makes it perfect for sites with spatial constraints.

Four of these units can be transported in a 40ft, high cube, open top container, thereby substantially reducing transport costs.

FEATURES & BENEFITS

- 800mm (32") wide heavy duty 50' long conveyor
- Large feed hopper
- Close coupled, diesel powered or electric powered
- Fast on site setup time - 5 minutes
- Adjustable feedboot height to minimize impact
- Feedboot extensions.

WHEELED STACKER

Pivoting axle box allows for creating swept radius stockpiles

All guarding is fully compliant with CE specifications.

Units can be containerised, which significantly reduces transport costs.

Can be coupled with Tesab crushers and screeners maximum production.

PERFORMANCE SPECIFICATION

* Depending on application

DIMENSION SPECIFICATION*

* Depending on material density and set-up
